Message from the Guest Editors

Coronavirus disease 2019 (COVID-19) is the condition caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Since 2020, the pandemic has influenced our lives in nearly every corner of the world, causing over 770 million confirmed cases and more than 7 million deaths globally. On 5 May 2023, more than three years after the pandemic had been declared, the World Health Organization ended the global emergency status for COVID-19; however, the end of the pandemic will not be the end of COVID-19. It is necessary to continue protecting the most vulnerable people against the disease and its complications, through routine vaccination. In this way, many pivotal points are open and need to be clarified.

This Special Issue, titled “COVID-19 and Global Chronic Disease 2024: the Post-Pandemic era”, aims to report the state of the art and the new challenges resulting from COVID-19. In particular, we want to discuss the therapies, vaccines, public health policies, and social aspects related to this disease. We invite eminent scholars and emerging researchers to submit high-level scientific articles, as indicated in the keywords.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Medicine, Research and Experimental)
