Message from the Guest Editor

Dear Colleagues,

Because of epidemiological transition and demographic changes, many nations are still facing many infectious diseases and gradually transitioning to chronic and noncommunicable diseases. Based on the double burden of chronic and infectious diseases globally, researchers and health planners are continuously striving to reduce or eliminate infectious diseases using vaccines, identifying newer antimicrobials in the face of the increasing problem of drug resistance, educating people in preventive measures and personal hygiene, and early and effective screening for both infectious and chronic diseases.

This Special Issue welcomes original articles, brief reports, and review articles describing research findings on epidemiology, pathogenesis, management, treatment algorithms, clinical trials, microbial agents, etc. on infectious diseases. Also, it provides a forum in which researchers from a wide variety of disciplines can report their findings in a number of chronic and noncommunicable diseases and conditions, including population-based interventions of chronic diseases, minority health, health disparities, and disease prediction models.

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Medicine, Research and Experimental)
