Diagnosis and Treatment of Upper and Lower Gastrointestinal Malignancies: Current Advances and Future Prospects

Message from the Guest Editor

Cancers of the upper and lower gastrointestinal tract constitute a high global burden, with gastric and esophageal cancers representing the fifth and sixth most common cancers worldwide, respectively. Despite improvements in screening, diagnosis, and radiation, surgical, and systemic therapies, global survival rates remain unsatisfactory, and the disease remains incurable in advanced stages. The focus of this Special Issue is to highlight global research efforts to improve outcomes in patients with upper and lower gastrointestinal cancers. We recognize that dramatic improvements in the management of these malignancies in recent decades have resulted from a multidisciplinary evaluation and treatment of patients. As such, we invite colleagues from across all disciplines, epidemiology, basic and translational science, genetics, nutrition, surgery, surgical oncology, hematology and oncology, radiation oncology, radiology, interventional radiology, gastroenterology, palliative care, and pathology, to highlight recent advancements in their respective fields that have contributed to the global care of patients with upper and lower gastrointestinal cancers.

About the Journal

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Omar Cauli

Frailty and Cognitive Impairment—FROG Research Group, University of Valencia, 46010 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
