Special Issue

Innovation, New Technologies, and Future Prospects in Endometrial Cancer Surgery

Message from the Guest Editor

This Special Issue aims to investigate the latest advancements and future directions in the surgical management of endometrial cancer. Contributions will encompass a spectrum of topics including robot-assisted surgery, minimally invasive techniques, image-guided interventions, and the integration of artificial intelligence in surgical planning and execution. Additionally, we seek to highlight the influence of these innovations on patient outcomes, surgical accuracy, and the overall delivery of healthcare. This collection of papers will provide an exhaustive overview of the current landscape and future directions of endometrial cancer surgery, offering valuable insights for researchers, clinicians, and policymakers. Furthermore, we welcome studies focusing on patient quality of life, long-term outcomes, and the cost-effectiveness of new surgical approaches in the treatment of endometrial cancer.

About the Journal

Message from the Editorial Board

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.
Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Maurizio Battino
Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Prof. Dr. Omar Cauli
Frailty and Cognitive Impairment—FROG Research Group, University of Valencia, 46010 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.7 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
