

Special Issue

Lipids, Health, and Diseases: The Interplay

Message from the Guest Editors

The purpose of this Special Issue is to present current research that tackles the role of lipids in disease development and/or treatment. Current challenges to treat diseases such as cancer, neurological diseases, and cardiovascular diseases involve potent lipid mediators including eicosanoids and platelet-activating factors or changes of cellular lipid compositions. With the advances in 'omics' technologies and research, there is potential to discover novel lipid biomarkers and lipid mediators with pro-resolving effects, such as resolvins and protectins, and design new treatments. This Special Issue will provide an open access opportunity to publish research work and review articles related to recent advances in understanding the role of lipids in health and disease and will hopefully present new molecular insights for developing potential therapeutic treatments as well as better patient diagnostic and disease prevention strategies.

Guest Editors

Dr. Ronan Lordan

Institute for Translational Medicine and Therapeutics, Perelman School of Medicine, University of Pennsylvania, Philadelphia, PA, USA

Dr. Ioannis Zabetakis

Department of Biological Sciences, University of Limerick, Limerick, Ireland

About the Journal

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Omar Cauli

Frailty and Cognitive Impairment—FROG Research Group, University of Valencia, 46010 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
