Paediatric Respiratory Tract Infections: Present Considerations—Future Prospectives

Message from the Guest Editors

Infectious diseases of the respiratory tract are the most common disease entity in Pediatrics worldwide, with millions of children affected every year. Even though existing scientific knowledge in this field is well established and thorough, various factors such as the re-emergence of vaccine-preventable diseases, the refugee crisis, along with increasing antibiotic resistance, shortage of pediatric antibiotic trials, and several others, prompt the need for constant surveillance and immediate reaction. This Special Issue aims to provide an open platform dedicated in presenting existing knowledge in the field of Pediatric Respiratory Infections (both community- and healthcare-associated infections), along with recording current trends in this field and shedding light to future prospects. Researchers from various scientific communities are welcome to present their latest research and discuss common themes and challenges.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Omar Cauli

Frailty and Cognitive Impairment—FROG Research Group, University of Valencia, 46010 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
