Brain Neuromodulation for Movement Disorders and Pain

Message from the Guest Editor

Brain neuromodulation aims to induce the stimulation of cortical areas or basal ganglia nuclei in the attempt to reduce chronic symptoms of complex neurological conditions, including movement disorders and chronic pain, by directly altering brain activity. Currently, there are a number of standard invasive and noninvasive methods: some have shown great promise in treating neurological disorders, while others are already accepted in clinical practice. This Special Issue wants to collect scientific works illustrating brain neuromodulation procedures by discussing results, advantages and disadvantages, and possible mechanisms of action. We welcome all Colleagues who wish to describe their experience in this exciting field of functional neurosurgery.

About the Journal

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Omar Cauli

Frailty and Cognitive Impairment—FROG Research Group, University of Valencia, 46010 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
