Food Bioactive Compounds and their Role in Diseases

Message from the Guest Editors

Bioactive compounds are found naturally in foods and have some active effect on our bodies; they have attracted a lot of interest from the scientific community for their ability to improve or protect our health.

Bioactive compounds are found in many different types of foods (i.e. polyphenols, carotenoids, glucosinolates, marine compounds, polysaccharides, peptides and proteins, etc.). There's already a large amount of evidence that people who eat diets rich in bioactive compounds have reduced risks of developing chronic diseases, such as cardiometabolic pathologies, brain health/cognitive reduced function, cancer onset and development, etc.

This Special Issue aims to provide an open platform that brings together researchers from various scientific communities to present the latest research and discuss common themes and challenges to understanding the impacts of food bioactives on health and diseases.

About the Journal

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Omar Cauli

Frailty and Cognitive Impairment—FROG Research Group, University of Valencia, 46010 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
