Current and Potential Therapeutic Strategies for Heart Failure

Message from the Guest Editor

Despite significant advances in pharmacotherapy and therapy, heart failure remains a major cause of mortality and morbidity, and is a growing healthcare burden worldwide. However, there has been a growing understanding of the underlying disease mechanisms of heart failure, although there remain gaps in the knowledge, particularly with respect to acute decompensated heart failure, heart failure with preserved ejection fraction, and in the management of prevalent comorbidities that contribute to its pathophysiology, such as diabetes and anaemia. This Special Issue will focus on recent research and developments in these areas.

Guest Editor

Prof. Dr. Chim C. Lang

About the Journal

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Omar Cauli

Frailty and Cognitive Impairment—FROG Research Group, University of Valencia, 46010 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
