Krasnaya Str., 430005 Saransk,
Republic of Mordovia, Russia

Dr. Anatoliy A. Khapugin

Deadline for manuscript
submissions:

closed (30 September 2023)

Message from the Guest Editors

Invertebrates display a high biodiversity worldwide. Each year, new species are described in various climatic zones. Despite significant efforts to study biodiversity, many data are still not published. This hinders the analysis of species distribution, the analysis of variability in species ranges and species abundance, as well as the analysis of the alpha diversity of regions and the identification of “biodiversity hotspots”. Datasets, databases, networks, and data infrastructures have been used in recent years to understand species distribution. A “data paper” provides a description of research data sets (one dataset per article). Preparing, processing and describing such data requires effort. Data papers provide recognition for these efforts through peer-reviewed publication. The described datasets should be publicly available prior to publication, preferably under an open-access license, to allow other users to re-use the dataset. The document must provide a URL to the public version of the dataset. The lower threshold for the number of occurrences is 2000 occurrences.

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))
