DNA Barcoding for Biodiversity

Guest Editor:

Dr. Andrea Galimberti

ZooPlantLab, Department of Biotechnology and Biosciences, University of Milano-Bicocca, P.za della Scienza 2, 20126-I Milano, Italy

Deadline for manuscript submissions:

closed (30 September 2018)

Message from the Guest Editor

Dear Colleagues,

The reliability of DNA barcoding relies on three main pillars which are i) a strict standardization of analytical procedures, ii) an efficient computerization of sequence data through accurate bioinformatics approaches and iii) an integration of different disciplines to provide solid reference publicly available databases for species assignation.

This special issue is devoted to the advances in DNA barcoding to address all the aspects related to biodiversity with the main goals of i) elucidating the analytical and bioinformatics advances currently available for this molecular approach; ii) defining the new frontiers of application in the context of biodiversity and biomonitoring and iii) encouraging the population of public genetic archives to also include those neglected groups of animal and plant biodiversity.

I cordially invite researchers working actively in these fields to submit their original research manuscripts to this special issue.

Dr. Andrea Galimberti Guest Editor

Institute of Pharmacy and Molecular Biotechnology, Heidelberg University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
