Taxonomy, Diversity and Evolution of Bryophytes

Guest Editor:

Prof. Dr. Jakub Sawicki

Department of Botany and
Nature Protection, University of
Warmia and Mazury in Olsztyn,
Plac Łódzki 1, 10-727 Olsztyn,
Poland

Deadline for manuscript
submissions:

closed (30 April 2021)

Message from the Guest Editor

Diversity is launching a Special Issue dedicated to “Taxonomy, Diversity, and Evolution of Bryophytes”

Bryophytes, a type of early land plant, are one of the least scientifically explored groups of organisms. The phenotypic plasticity, influenced by the environmental and genetic factors, make bryophytes a challenging group for taxonomists. An integrative taxonomy approach leads to the description of new genera and species of bryophytes with wide distribution ranges, suggesting that the global diversity of these plants is still underestimated. On the other hand, many endemic species with a narrow ecological range are close to extinction, driven by anthropogenic or natural factors, introducing new challenges in the active protection of these species. In this Special Issue, the taxonomy, diversity, and evolution of bryophytes are documented, along with novel genetic resources, such as organellar genomes, transcriptomes and barcoding datasets.

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
