Message from the Guest Editors

In this Special Issue, we will explore the long history that humans have had with wild animals, with three overarching themes: (1) the changing patterns of human interactions with wild animals over our 200,000+ year history, (2) the circumstances that result in human–wildlife conflict versus coexistence, and (3) the conservation and management implications of human–wildlife interactions. We will consider including articles that address topics such as the ecology and evolution of species coexistence, changing human attitudes towards wild animals, human–animal ecological relationships (predator–prey, competitive, mutualisms, commensalism, amensalism), sources of conflict between humans and animals, competition between humans and animals for resources and space, urban animals and biodiversity in cities, animals as ecotourism subjects, the role of protected space, and implications for wildlife managers.

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
