Ecology and Conservation of Freshwater Mollusks

Guest Editor:

Dr. Joaquim Reis

MARE-Marine and Environmental Sciences Centre, ARNET-Aquatic Research Network, Faculdade de Ciências, Universidade de Lisboa, Campo Grande, 1749-016 Lisbon, Portugal

Deadline for manuscript submissions:

15 December 2024

Message from the Guest Editor

Freshwater mollusks include bivalves and gastropods and comprise a remarkable diversity of ecological strategies and adaptations, because of different evolutionary histories and adaptations to highly variable environments. Freshwater habitats include rivers and streams, lakes and ponds, springs, and a variety of artificial structures such as fountains and canals. They show different hydrological regimes, from permanently flowing to temporary and intermittent, presenting a wide array of challenges to mollusks living in them.

This special issue presents a great opportunity to bring together novel contributions about the ecology of freshwater mollusks, and their conservation, both regarding bivalves and gastropods, native or invasive species. We kindly invite you to submit manuscripts about the above-mentioned topics, and specially encourage wide-scale applicable case-studies and integrative approaches using multi-disciplinary studies. If you are interested in this opportunity or have any doubts, do not hesitate to contact us.

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
