### Message from the Guest Editors

We would like to generate an update of aquatic phototrophic biofilm knowledge by collecting recent contributions either derived from biofilm applications and control investigations, or provided through a modern analytical approach on their diversity and functioning, also in the context of biofouling and plastic pollution impacts.

- Aquatic phototrophic biofilm (APB) diversity
- APB structure
- APB functioning
- APB and micro-biofouling
- APB novel study approaches

## Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
