Deadline for manuscript submissions:

closed (30 April 2023)

# **Message from the Guest Editors**

Raptors are a diverse avian guild distributed worldwide and adapted to different environments. They have attracted a strong interest from scientists because of their conservation status and ecology. Raptors provide critical ecosystem services based on their role in natural food chains. Raptors have evolved ecologically to adapt and specialize to different habitats and prey species. Thus, they are subject to a wide range of biological, ecological and evolutionary studies. Understanding and studying their demography, abundance, diet, resource selection, movements, ecological requirements and threats will provide valuable information about current ecosystem functioning and status.

This Special Issue will provide information regarding the current state of raptors across the world and their role in global conservation priorities.

## **Message from the Editor-in-Chief**

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))
