Deadline for manuscript  
submissions:

**closed (31 January 2019)**

### Message from the Guest Editor

Dear Colleagues,

A consensus has been reached that various components of biodiversity influence ecosystem functioning, but inferences regarding the ecological consequences of altered biodiversity are largely derived from small-scale studies. Natural ecosystems are dynamic over a variety of temporal and spatial scales, changing processes of community assembly, and altering how species interact with one another and their environment. Consequently, tremendous uncertainty surrounds estimates of the functional consequences of alternative biodiversity-environmental futures. This Special Issue considers how the spatial and temporal dimensions of ecosystems may moderate biodiversity-functioning relations across a range of environmental contexts.

## Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))
