Message from the Guest Editor

Dear Colleagues,

More recently, stable isotope analysis has contributed greatly to our understanding of niche partitioning in plants and animals, compound-specific isotope analysis has proved an important tool in trophic ecology and promises to advance our understand of micropollutants in the environment. The applications of stable isotope analysis are many and varied and their importance to ecological studies has become indispensable.

This special issue seeks to address the breadth of the application of stable isotope analysis to all types of ecological questions as well as to highlight recent advances in the use of stable isotopes in ecology.

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: Covered in the [Science Citation Index Expanded \(SCIE\)](#) in Web of Science, as well as in [BIOSIS Previews](#), [Scopus](#) and [other databases](#).

CiteScore 2019 (Scopus data): 1.7, which equals rank 34/75 (Q2) in the category 'Agricultural and Biological Sciences (miscellaneous)', 196/370 (Q2) in 'Ecology', 23/31 (Q3) in 'Ecological Modelling' and 82/160 (Q2) in 'Nature and Landscape Conservation'.
