submissions:

25 June 2023

Message from the Guest Editor

Climate and anthropogenic effects have been the main drivers of global mammal biodiversity. As mammal species shift in response to climate change, colonization by invasive species may also be enhanced. Furthermore, anthropogenic changes are the main global factor influencing mammal biodiversity loss. Due to anthropogenic disturbances, mammals are downsizing, and some studies have pointed a biomass compensation by small mammals, mainly rodents. As a result, the world is observing the “Gulliver Syndrome”; this affects several ecosystem functions, services, and human well-being.

We invite papers that identify the magnitude of climate change and anthropogenic drivers of mammal biodiversity. Especially, submissions covering a wide range of mammal biodiversity, with a focus on how climate change and anthropogenic changes affect them. We particularly welcome papers discussing the ecological consequences of mammal biodiversity loss, stimulating debate on how to revert the loss of mammals to restore biodiversity and ecosystem services.

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
