Deadline for manuscript
submissions:

closed (30 April 2018)

Message from the Guest Editor

Dear Colleagues,

The diverse range of marine bioactive compounds, especially those from marine-symbiotic bacteria, has been utilized for variety of industrial and environmental applications. However, to maximize the stream of bioactive compounds from these symbiotic bacteria, sound understanding on the taxonomical and functional diversity of these symbionts has to be increased. This Special Issue, entitled “Diversity of Marine Invertebrate and Seaweed Symbiotic Bacteria”, is designed to generate such information, to improve the understanding on the existence of true symbiotic relationships between the host and symbiotic bacteria, which, in turn, will aid towards utilization of such bacteria for biodiscovery and biotechnology.

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))
