### Message from the Guest Editors

This Special Issue provides an opportunity to improve the knowledge on phylogeography and conservation of rare, threatened, and endemic plant species in Mediterranean-type ecosystems. The aim is to provide a platform for further discussions between scientists and practitioners, including the integration of different plant conservation issues with management and biological conservation concepts. Papers on new techniques to establish proposals on conservation, restoration and management, conservation status and main threats, genetic conservation, niche modelling, etc., that will provide a clear connection between plant phylogeography and conservation are welcomed from any botany discipline.

## Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
