Plant Diversity on Islands

Guest Editor:

Dr. Maria Panitsa

Department of Biology, University
of Patras, 26504 Patras, Greece

Deadline for manuscript
submissions:

31 May 2024

Message from the Guest Editor

Islands host a considerable portion of all plant species worldwide, among which there are many endemic, rare, and range-restricted ones. Many islands remain quite unexplored concerning their plant species composition, and research in this topic is important since a substantial part of island plant diversity remains unknown to science. The plant diversity on islands is surprising, but without complete knowledge, successful conservation and protection cannot be realized. We welcome your contributions to this Special Issue, which provides a platform to highlight new research and significant advances concerning all aspects and different levels of plant diversity on islands and factors affecting it.

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
