## Fungal Diversity

### Message from the Guest Editors

Fungi are a group of organisms with a high level of diversity, and are well known as the second most speciose group after insects; hence, it is challenging to complete the global fungal diversity estimates compared to other organisms. In various ecosystems, fungi are found as pathogens, decomposers, and mutualists, and are of significant ecological value as they impact nearly every component of ecosystem services, while in most cases the role of an individual fungus in nature is still unknown. Despite the fungal diversity that science has revealed and their innumerable roles in ecology, health, and industry, much about these unique organisms remains a mystery. This topic will cover all fungi-related subjects: taxonomy, phylogeny, pathology, toxicology, ecology, and biotechnology. Both original and review articles are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
