

Special Issue

Avian Diversity in Forest and Grassland—2nd Edition

Message from the Guest Editor

Throughout the world, forest and grassland (including savanna) are major biomes, and their most attractive components are birds. Despite intensive research on their diversity, population density, habitat selection, population changes, and other aspects of ecology, there is still an urgent need for further studies. This Special Issue is an excellent opportunity to report on recent research on ecological aspects of forest and grassland birds. Authors are encouraged to submit reviews, synthesis work, and specific case studies with broad implications. Topics of interest for this Special Issue include the following: 1) the impact of environmental changes (e.g., forest and grassland fragmentation, edge effect, climate change, nest boxes, breeding and feeding ecology, habitat selection) on diversity, population density, and population dynamics of forest and grassland birds; 2) comparison between avian communities in natural and cultivated forests and grasslands, and between urban and exurban woodlands; 3) birds (woodpeckers, raptors, hole-nesting passerines) as indicators of forest and grassland condition.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
