

Special Issue

Microbial Diversity and Function Exploration in Oilfield Ecosystems and Petroleum-Contaminated Environments

Message from the Guest Editor

Microorganisms are associated with considerable biological activity in petroleum-impacted ecosystems, exhibiting remarkable metabolic versatility under both aerobic and anaerobic conditions. Such microbial systems now serve as vital models for the study of microbial ecology in extreme environments and the development of nature-based solutions for environmental protection. Under current environmental and energy requirements, research on microbial communities in oilfield ecosystems and their petroleum-contaminated surroundings has assumed critical importance. As global energy demands continue to drive petroleum extraction and transportation, investigating how microbial communities respond and adapt to these petroleum-rich habitats presents both fundamental challenges and practical opportunities. This Special Issue will highlight innovative research that elucidates the diversity, ecological functions, and biotechnological potential of microbial communities in oilfield and petroleum-contaminated environments.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
