

## Special Issue

# Genetic Diversity of Natural Animal Populations: The Influence of Anthropogenic Factors

### Message from the Guest Editors

Genetic diversity is critical for the health, stability, and adaptation of native populations in changing environmental conditions, which is important both for the functioning of ecosystems as a whole and for human activities—for example, fisheries and aquaculture. Anthropogenic activity, such as main roads with high volumes of traffic, cause changes in the natural habitats of many animals, which could reduce gene flow and affect the formation of population structure. Populations inhabiting human-modified landscapes can be subject to the multidirectional influences of anthropogenic factors, which can have varying effects on both gene flow and the genetic diversity of species and populations. The purpose of this Special Issue is to showcase various studies in the field of population genetics to understand the current trends and advancements in the study of the influence of anthropogenic factors on the genetic diversity of populations.

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

---

### Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg  
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
