

## Special Issue

# Biodiversity and Its Function Change in the Alpine Ecosystem under Human Activity

### Message from the Guest Editors

Alpine grassland plays an important role in carbon (C) fixation and water and biodiversity conservation. Grazing is the main way for humans to use alpine grassland, but unfortunately, the degradation of alpine grasslands has been accelerated by climate change and grazing activities. Human disturbances are quick and serious, seriously threatening the fragile alpine ecosystems. The degraded alpine grassland area has reached 83% of the total available grassland area because of overgrazing, while 50–60% of degraded grasslands have lost all grazing function. Degradation of alpine grasslands is a chain reaction, which has recently drawn significant interest and become a global concern. The subject of this Special Issue is to elucidate the vegetation, soil nutrients, soil hydrology, plant diversity, productivity, and mechanisms of alpine grassland ecosystems responding to human activity. Observational, experimental, and modeling studies are welcomed.

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

---

### Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg  
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
