

## Special Issue

# Impact of Anthropogenic Activities on Amphibians and Reptiles: Threats and Conservation

### Message from the Guest Editor

Amphibians and reptiles are among the most threatened groups of species, and their decline is linked to direct and indirect human activities. Threats generally include habitat loss or degradation, invasive species and climate change. However, human activities are also the reason why some species are still extant. For instance, the number of amphibian and reptile species benefitting from conservation activities and the impact of these projects on population dynamics is generally unclear, and the number of species extinct in the wild but surviving in captivity is not determined. This Special Issue focuses on novel research on the impact of human activities on amphibians and reptiles, and we welcome contributions focusing on both the vulnerability and conservation of species and populations, including policies and assessments of species' threats and conservation statuses. Similarly, research on local adaptation—or the lack thereof—due to recent shifts in human activities are welcome, including the impacts of the COVID-19 pandemic, and long-term factors such as adaptation to light and sound pollution and temperature increase.

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
