

Special Issue

Diversity, Biogeography, Fossil Record and Evolution of Bivalvia

Message from the Guest Editors

Bivalves have inhabited the Earth for over 500 million years, since the Early Cambrian. They have the ability to create and modify habitats for other organisms, affect food webs, and influence biodiversity in aquatic ecosystems. Since the early phases of human evolution, bivalves have been used for food, jewelry, interior decorating, and even money. It is no wonder that some of the bivalve groups today are threatened or extinct. Therefore, it is of great interest to improve our knowledge of their taxonomy, biodiversity, and ecology. This Special Issue gives us a chance to look at these important aquatic organisms from all sides. Therefore, we cordially invite you to contribute to this Special Issue, focusing on any of the abovementioned topics, from taxonomic, ecological, and conservation aspects to paleontological and palaeoecological themes. We aim to not only present state-of-the-art results but also provide synergies in order to better understand and protect this diverse group of mollusks.

Guest Editors

Prof. Dr. Jasenka Sremac

Faculty of Science, University of Zagreb, Horvatovac 102b, 10000 Zagreb, Croatia

Dr. Marija Bošnjak

Croatian Natural History Museum, Demetrova 1, 10000 Zagreb, Croatia

Deadline for manuscript submissions

15 July 2026

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
