

Special Issue

Biodiversity Research in Bulgaria

Message from the Guest Editors

With a total of 112 species on the international registers of endangered taxons, Bulgaria has rich biological diversity, which is subject to the impacts of a variety of threats caused by human activity and natural processes that occur in ecosystems. Anthropogenic threats to terrestrial systems include construction activities, infrastructure projects, resource extraction, agricultural intensification/extensification, illegal logging, environmental pollution, direct extermination/exploitation, genetic erosion, introduction of alien invasive species and climate change. This Special Issue of *Diversity* aims to publish original contributions addressing questions of importance in biodiversity and related fields from Bulgaria. We welcome manuscripts conveying novel experimental findings that would advance the understanding of impact of activities on biodiversity; impact of threats on ecosystems and biodiversity; establishment of a database on species; establishment of the status of vegetation in particular areas and data on the status of environmental components and biodiversity. Manuscripts reporting the development or testing of novel taxons are also welcome.

Guest Editors

Prof. Dr. Peter Hristov
Dr. Georgi Radoslavov
Dr. Boiko Neov

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
