

Special Issue

Aquatic Biodiversity and Habitat Restoration

Message from the Guest Editors

Aquatic ecosystems are fundamental to life on Earth. However, these ecosystems are under severe threat globally due to various human activities, including pollution, habitat destruction, and overexploitation. The resulting decline in aquatic biodiversity not only undermines the ecological integrity of these systems but also has far-reaching implications for human well-being. The degradation of aquatic habitats has not only threatened species survival but also compromised fisheries' productivity, impacting the livelihoods of millions who depend on aquatic resources. This Special Issue focuses on Aquatic Biodiversity and Habitat Restoration. It aims to bring together the latest research on understanding the current status of aquatic biodiversity, identifying the major drivers of its decline and developing innovative strategies for habitat restoration. Papers may cover a wide range of aquatic ecosystems, from freshwater rivers and lakes to marine coastal areas. We encourage submissions that combine field studies, experimental research, and theoretical modeling to provide comprehensive insights.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
