

Special Issue

Distribution of Bryophytes in a Changing World

Message from the Guest Editor

Bryophytes are the second largest group of terrestrial plants after angiosperms, and not only for that reason, they deserve our attention. In a changing world, it is important to understand the mechanisms of change that occur, and this topic is now even more important to understand due to ongoing climate change. This Special Issue is focused on those changes from a broader perspective because it is not only about changes in the occurrence of bryophytes, but also their bioindication ability, changes in connection with climate change, understanding the causes and effects of such changes, predicting the future trends and others topics related to the changing world and bryophytes. The team at *Diversity* and ourselves kindly invite you to submit a manuscript focused on any of the above topics.

Although specific case studies with broad implications are welcome, we encourage authors to submit large-scale and/or multi-specific studies, synthesis works, and reviews that could better enlarge our knowledge of the distribution of Bryophytes in a Changing World. If you are interested in this opportunity or have any questions, please do not hesitate to contact us.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
