Ecotones as Diversity Drivers: New Research Perspective from Boundaries and Border Habitats

Message from the Guest Editor

Ecotones are promising research targets; they are likely areas of high species richness, genetic and phenotypic diversity, and divergence. Ecotones do not merely represent a boundary or an edge; the concept itself of an ecotone assumes the existence of an active interaction between two or more habitats, consisting of the interactions of different environmental pressures. These interactions may create unique features that do not exist in either of the adjacent environments.

Ecotones can sustain ecotypes or species that are less represented or do not occur in other environments, and some populations may diverge to new lines/phenotypes in the face of gene flow across the interface. This Special Issue will comprise papers covering a wide range of aspects related to the distribution, features and diversity drivers of ecotone communities. Papers selected for this Special Issue can also address functional, developmental and morphological aspects of organisms adapting to new habitats at the border with their current distribution.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
