

## Topical Collection

# Evolution and Extinctions on Islands

### Message from the Collection Editors

Islands are often described as "laboratories of evolution", because on these isolated areas various remarkable evolutionary processes can be observed in both plants and animals. They include unexpected colonisation events, endemism, size increase or decrease in various lineages, unusual adaptive radiations, etc. Moreover, insular ecosystems are often fragile and widespread extinctions have been well documented on many islands following the arrival of invasive species. The aim of this topical collection is to gather contributions covering all aspects of evolution and extinction in insular environments, both in the past and today, from palaeontologists, botanists and zoologists working on all groups of organisms.

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q2  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.3 days after submission; acceptance to publication is undertaken in 4.4 days (median values for papers published in this journal in the second half of 2024).
