

Special Issue

Evolution and Diversity of Fishes in Deep Time

Message from the Guest Editors

We are pleased to announce a forthcoming Special Issue of *Diversity* entirely focusing on extinct fishes. With more than 1200 and 34,000 species, respectively, cartilaginous and bony fishes form the majority of living vertebrates. Their evolutionary history encompasses more than 500 million years of evolution, and they witnessed tremendous changes in the abiotic world, including several major extinction events. However, despite all progress that has been accomplished in recent decades, our knowledge about their evolutionary history and the underlying causes that shaped their past and modern diversity patterns remains insufficient. This is largely due to the lack of detailed morphological studies of fossil taxa, which are essential for conducting comprehensive studies. Consequently, the limited data sets and insufficient morphological and taxonomic descriptions continue to represent a serious problem in analyzing the interrelationships and diversity patterns of fishes in deep time.

Guest Editors

Prof. Dr. Jürgen Kriwet
Dr. Eduardo Villalobos-Segura
Dr. Sebastian Stumpf

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
