

Special Issue

Biodiversity Conservation Planning and Assessment

Message from the Guest Editor

How to quantitatively assess biodiversity is a core issue in ecology and biodiversity science. Today, various techniques such as remote sensing, spatial analysis, and landscape metrics have been applied to biodiversity assessment and planning. In this Special Issue, we encourage the submission of the manuscripts exploring the following, and related, topics:

- Assessment of multiple level biodiversity via various techniques as remote sensing, spatial analysis;
- Development of new approaches in assessing biodiversity at site, local, or regional scales;
- Biodiversity conservation planning: from core zone design to landscape planning;
- Assessment of the effects of climate change, environmental filtering or human disturbance on biodiversity.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
