

Special Issue

Ecology and Conservation of Freshwater Mollusks

Message from the Guest Editor

Freshwater mollusks include bivalves and gastropods and comprise a remarkable diversity of ecological strategies and adaptations, because of different evolutionary histories and adaptations to highly variable environments. Freshwater habitats include rivers and streams, lakes and ponds, springs, and a variety of artificial structures such as fountains and canals. They show different hydrological regimes, from permanently flowing to temporary and intermittent, presenting a wide array of challenges to mollusks living in them. This special issue presents a great opportunity to bring together novel contributions about the ecology of freshwater mollusks, and their conservation, both regarding bivalves and gastropods, native or invasive species. We kindly invite you to submit manuscripts about the above-mentioned topics, and specially encourage wide-scale applicable case-studies and integrative approaches using multi-disciplinary studies. If you are interested in this opportunity or have any doubts, do not hesitate to contact us.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
