

Special Issue

Biodiversity of Mesophotic Ecosystems

Message from the Guest Editors

We are pleased to announce the Special Issue “Biodiversity of Mesophotic Ecosystems” in the journal of *Diversity*. Mesophotic coral ecosystems (MCEs) and temperate mesophotic ecosystems (TMEs) have received increased attention during the last few decades. New technologies and methods have become more available to study these deeper parts of the reef ecosystems, yielding many discoveries. However, basic gaps in knowledge remain in our scientific understanding of the global diversity of mesophotic ecosystems, limiting the ability to recognize biogeographic patterns and to make educated decisions for management and conservation of these ecosystems. With this Special Issue, we aim to increase the scientific knowledge on the diversity of fish, corals, and other associate taxa on mesophotic ecosystems, and how they relate to shallow reefs and the deep sea. We invite everyone to join our efforts and contribute by submitting papers to this important issue.

Guest Editors

Dr. Hudson Tércio Pinheiro

Department of Ichthyology, California Academy of Sciences, San Francisco, CA 94118, USA

Dr. Gal Eyal

ARC Centre of Excellence for Coral Reef Studies, School of Biological Sciences, University of Queensland, St. Lucia, QLD 4072, Australia

Deadline for manuscript submissions

closed (31 December 2022)

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
