

Special Issue

The Phylogenetic Diversity of Cyanobacteria and Algae

Message from the Guest Editors

The diversity of algae and cyanobacteria is extensive in aquatic and terrestrial ecosystems, where they act as important primary producers. Even though genetic studies of different taxonomic groups have recently intensified, the rate of discovery of novel biodiversity remains relatively high. Phylogenetic studies can provide insights into the evolution and biodiversity of cyanobacteria and algae, as well as their biogeography and systematics in general. In this Special Issue, we encourage the submission of manuscripts that describe the phylogenetic relationships of different taxonomic groups of cyanobacteria and algae, especially those from under-sampled taxa, unexplored environments, and those exhibiting cryptic diversity among species.

Guest Editors

Prof. Dr. Gabrielle Zammit

Department of Biology, Faculty of Science, University of Malta, Msida, Malta

Prof. Dr. Elliot Shubert

School of Life Sciences, University of Westminster, London, UK

Deadline for manuscript submissions

closed (30 September 2023)

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
