

## Special Issue

# Ecology, Conservation and Restoration of Threatened Animal

### Message from the Guest Editor

We are pleased to announce a Special Issue in *Diversity* entitled “Ecology, Conservation, and Restoration of Threatened Animals”. The emerging mass extinction has been changing the global ecosystem and harming human well-being. Currently, countries are forging an agreement to protect and conserve 30% of the planet by 2030 in the 2022 UN Biodiversity Conference with an aim to lessen biodiversity loss. Ecological characteristics vary in different threatened species, and so do the conservation and restoration approaches. We urgently need to understand the populations and habitats of threatened animals, reveal the factors causing the endangering progress, and derive conservation policies and management measures to conserve these species. Knowledge of those topics is the bridge that will lead us from the area-based conservation approach of “30 by 30” to achieving the goal of actually restoring or maintaining global biodiversity. We invite you to submit manuscripts focused on the current status and challenges, novel methods, solutions, and future perspectives in the field of ecology and conservation of threatened animals.

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
