

## Special Issue

# Community Ecology, Macroecological Patterns and Conservation of Tropical Beetles

### Message from the Guest Editors

In this Special Volume, we emphasize studies on community ecology and macroecology of tropical beetles, without prejudice for any beetle family, biome or geographic region within the tropics and subtropics. We will also emphasize the conservation issues that mean that many groups/species may currently suffer from a plethora of local and general threats (from deforestation to overcollecting, from pollution to climate change).

Thus, we are happy to invite you to contribute to this Special Issue with the latest and most updated research from both you and your colleagues. Keywords

- coleoptera
- ecology
- conservation
- patterns at different spatial scales

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
