Special Issue

Urban Ecology of the Amphibians and Reptiles

Message from the Guest Editors

Urbanization is recognized to be one of the main factors for habitat loss leading to local biodiversity extinction in urban areas. As urbanization is spreading rapidly across the globe, a basic challenge for conservation is to understand how it affects biodiversity. Although urbanization often causes the extinction of native species, the complex nature of urban land use can have a complicated influence on local biodiversity. Amphibians and reptiles represent a very important component of urban ecosystems. They occur in a variety of terrestrial and aquatic habitats and therefore tolerate the impact of human activity to varying degrees. This leads to a reduction in their diversity compared to natural conditions and changes in the structure of their populations and communities. This Special Issue will provide an opportunity to highlight new research on the problem of clarification of the ecological processes and changes occurring in the amphibian and reptile populations in urban environments around the world, and studies in this area will help to effectively plan conservation and restoration activities for the urban herpetofauna.

Guest Editors

Prof. Dr. Ivelin A. Mollov

Department of Ecology and Environmental Conservation, Faculty of Biology, University of Plovdiv "Paisii Hilendarski", 24 Tsar Asen Street, 4000 Plovdiv, Bulgaria

Prof. Dr. Richard Seigel

Department of Biological Sciences, Towson University, Towson, MD 21252, USA

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
