

## Special Issue

# Diversity, Biodiversity, Threats and Conservation of Arthropods

### Message from the Guest Editor

Arthropods represent one of the most diverse and abundant groups in the animal kingdom, playing crucial roles in numerous ecosystems around the world. However, their biodiversity faces multiple threats due to anthropogenic factors such as deforestation, climate change, pollution, and urban expansion. Habitat loss and unsustainable agricultural practices also contribute to the decline of many arthropod species, which can have drastic consequences for ecological stability and ecosystem services. This Special Issue of *Diversity* focuses on arthropod biodiversity, threats, and conservation, seeking to highlight novel research and innovative approaches to address these challenges. We invite researchers to submit studies ranging from biodiversity assessments and risk analyses to habitat conservation and restoration strategies. In addition, works that explore the biology and ecology of specific species will be valued, as well as research on the impact of environmental changes on arthropod populations.

### Guest Editor

Prof. Jaime Pizarro-Araya

Laboratorio de Entomología Ecológica, Departamento de Biología,  
Universidad de La Serena, La Serena, Chile

### Deadline for manuscript submissions

31 December 2025

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
