

Special Issue

Applications of Environmental DNA in Aquatic Ecology and Biodiversity

Message from the Guest Editors

Environmental DNA technology is gradually maturing and is currently widely used in aquatic ecosystem monitoring and biodiversity surveys worldwide, while research on biodiversity, species conservation, distribution patterns, and ecosystems based on environmental DNA survey results has also been booming. In this context, this Special Issue focuses on the latest progress of environmental DNA in the aquatic ecology and biodiversity research fields. We will gather the latest research achievements of outstanding scientists from different regions around the world, concentrate on showing the frontier trends of environmental DNA development, and further promote the application of environmental DNA in scientific research and practical protection management.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2026).
