

Special Issue

Wildlife Welfare

Message from the Guest Editor

Human activities, both intentional and unintended, constitute the biggest threat to wildlife, and are the reason for the current biodiversity crisis. For example, deforestation, habitat destruction, poaching, wildlife trafficking, or pollution all threaten the existence of many species and ecosystems. These activities might also cause physical injury, disease, fear, or suffering in wildlife. Furthermore, some direct human interventions, such as species management, wildlife research, and reintroductions might also have negative consequences for the wellbeing of individual animals. Therefore, animal welfare considerations should be a part of the discussions on biodiversity conservation. The focus of this Special Issue is on the different aspects of wildlife welfare, including both theory and empirical research. We welcome original research papers, reviews, and opinion pieces.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
