

Special Issue

Aquatic Insects: Biodiversity, Ecology and Conservation Challenges

Message from the Guest Editors

Although the efforts of aquatic entomologists have tremendously increased during the 21st century, much remains to be discovered. Our knowledge regarding aquatic insects is still far from complete, both in natural systems, such as springs, rivers, streams, lakes, and in artificial habitats, such as irrigation canals and human-made lakes (e.g., reservoirs, gravel pits, recreational lakes). For this Special Issue, we invite submissions that address all aspects of biodiversity of aquatic insects, from genetic through taxonomic and species diversity. Moreover, articles addressing the topics of aquatic insects' ecological features, such as their relation to environmental factors, ecological traits, trophic interactions, distribution patterns, and population dynamics, are highly welcomed. Finally, we highly encourage researchers to contribute to this issue with their studies on the impacts of anthropogenic disturbances on aquatic insects' diversity and ecology. We hope this issue will include a wide taxonomic range of aquatic insects, as well as proper representation of biomes, continents, and countries.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
