

Special Issue

Promoting Biodiversity in Forest and Landscape Restoration

Message from the Guest Editor

The promise of forest and landscape restoration (FLR), either through assisting natural regeneration or active planting for supporting global commitments regarding climate change mitigation, biodiversity conservation, and halting desertification, has never been greater. However, too often insufficient attention is still being given to the integration of biodiversity in (especially large-scale) restoration projects. Restoring ecosystems that become self-sustaining and able to persist under a changing climate requires the consideration of all levels of diversity, from soil-plant and plant-animal interactions, over genetic, functional, and species diversity, to landscape and ecosystem diversity. Approaches to FLR that embrace diversity are also more likely to generate an abundance of ecosystem services, and as such can lead to multiple wins. For this Special Issue we welcome submissions that showcase the importance, feasibility, and/or benefits of integrating biodiversity in FLR.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
