

Special Issue

Effects of Environmental Change on Meiofauna

Message from the Guest Editors

The Special Issue will include studies from terrestrial, freshwater and marine ecosystems around the world, addressing questions of habitat and ecosystem changes on meiofauna. We also welcome in situ and laboratory studies that aim to understand the mechanisms underlying meiofauna responses and wider ecosystem consequences of such.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).
