

## Special Issue

# Faunistical and Ecological Studies on Carabid Beetles

### Message from the Guest Editor

Carabid beetles (Coleoptera: Carabidae) are one of the best-known taxa in entomology. They are common in most terrestrial habitats and geographical areas and can easily be collected using standard methods.

Taxonomy, phylogeny, geographic distribution, habitat associations, and ecological requirements of carabid species are well known. Based on the above, carabids are often used as model organisms in faunistical and ecological studies. For this Special Issue I invite the submission of high-quality original research papers and reviews covering all aspects of carabid faunistic and ecology.

---

### Guest Editor

Prof. Dr. Tibor Magura

Department of Ecology, University of Debrecen, H-4032 Debrecen, Hungary

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
