

Special Issue

Forest Management and Biodiversity Conservation

Message from the Guest Editors

This Special Issue provides a platform to highlight new research and significant advances in assessing the forest ecosystem conditions and ecosystem services and to outline concepts and solutions for sustainable forest management and biodiversity conservation. The topic is open to contributions from forest ecosystems worldwide. However, a major focus will be given to forests in mountainous regions, as here the link between conservation and forest/land use is particularly complex. This further extends to all the ecosystem service categories offered by forest ecosystems. The current issue deals with topics such as ecological variability, climate change, forest management practices, forest conservation, and restoration. We also welcome significant contributions for ecological methods for forest exploitation, remote sensing applications in forestry, management and innovative practices for invasive species and tree pathogens, urban forests, and the management of forests after natural disturbances.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
